Barangay Batinguel E-System

System testing walkthrough — every process, by role. Generated 16 September 2026.

How to use this

Work down each table in order and tick the last column. Where a step says **should be refused**, a refusal *is* the pass — those rows test that the system stops things it ought to stop, and they are the ones worth demonstrating to a panel. Anything that behaves differently from the middle column is a finding; note the step number and what happened instead.

Accounts you need before starting

Role	Who	Notes
Public visitor	No account — use a private browser window	Tests what an anonymous resident of the barangay can reach.
Resident	Your own, or a groupmate's	Needs a real email address; signup requires confirming it.
Punong Barangay	Hon. Frankie Credo	Only this account can change the Kapitan status.
Barangay Treasurer	Adelina Fabillar Remata	Only this account can approve or decline court reservations.
Barangay Secretary	Alexis Theress P. Tan	Only this account can act on document requests.
Kagawad	Any other official	Used to prove the position restrictions actually bite.
Nurse	The health centre account	Medicines, clinic hours, health events.

A note on timing. Court bookings can only be made for today or later, and a slot stays held while it is pending. If a test fails because a slot is taken, pick a different date rather than assuming the feature is broken.

1. Public visitor (not signed in)

Use a private window so no session is carried over.

Step	What to do	What should happen	Pass?
1.1	Open the site's home page	Announcements, events and the waste collection schedule load. Barangay history and the profile section appear below.	
1.2	Check the contact numbers at the bottom of Home and in the footer	Landline (035) 226-2931 and mobile 0919 896 2588. On a phone, tapping either should start a call.	
1.3	Open **Officials**	All 11 officials appear with photographs — including Alexis Theress P. Tan and Nicholas Khyle R. Mondoñedo, who previously showed icons.	
1.4	Open **Health Center**	Clinic hours show as two blocks with the lunch break named. Today's row is marked. Medicine availability is listed by category with an "Updated" time.	
1.5	Between 12:00 NN and 1:00 PM, reload Health Center	A notice reads "On lunch break right now" and gives the reopening time. Nobody had to switch this on.	
1.6	Open **Court Reservation** and pick a date	The calendar shows which slots are taken and the activity type for each — but never who booked it or why.	
1.7	Submit a booking without signing in	Accepted, status pending. This is deliberate: a walk-in has no account.	
1.8	Try to reach /official, /nurse or /resident directly	**Should be refused** — redirected to the login page.	

2. Resident

2a. Registration and verification

Step	What to do	What should happen	Pass?
2.1	Open **Sign Up**	Separate boxes for first, middle, last name and suffix. Purok is a dropdown, not a free-text box.	
2.2	Try to submit without ticking the residency declaration	**Should be refused** — asks you to confirm you live in Barangay Batinguel.	
2.3	Complete signup with a real email address	Success message telling you to confirm your email.	
2.4	Check the inbox — **and the spam folder**	A confirmation email from Barangay Batinguel E-System. First messages from a new sender very often land in spam.	
2.5	Click the confirmation link, then sign in	You land on the **home page**, not a dashboard. Residents are citizens browsing a public site, not staff.	
2.6	Open your dashboard from the profile pill in the navbar	A banner says the account is pending verification.	
2.7	In Settings, upload a valid ID	Uploads. The ID is optional by design — requiring one would exclude the residents most likely to need a Certificate of Indigency.	

2b. Requesting a document

Step	What to do	What should happen	Pass?
2.8	While still unverified, try to request a document	**Should be refused** — you must be verified first. This is enforced in the database, not just by hiding the button.	
2.9	Have an official verify you (section 3d), then request a document	Accepted. Choose from Barangay Clearance, Barangay Certificate, Certificate of Indigency, Certificate of Residency, Business Clearance, or Other.	
2.10	Watch the request as the Secretary moves it along	Status follows pending → approved → ready for pickup → claimed. A badge marks changes you have not seen yet.	

2c. Court reservations

Step	What to do	What should happen	Pass?
2.11	Book a slot while signed in	Your details are prefilled. The booking appears under My Reservations.	
2.12	Book 8:00 AM for 2 hours, then try 9:00 AM for 1 hour on the same day	**Should be refused** — “Someone else just booked one of those hours”, and the slot list refreshes. The two overlap even though they start at different times.	
2.13	Try 11:00 AM for 3 hours	**Should be refused** — the court closes for lunch, so those hours are not consecutive.	
2.14	Cancel a pending or approved booking for a future date	Asks you to confirm, then releases the slot immediately. Someone else can book it right away.	

Step	What to do	What should happen	Pass?
2.15	Look for a cancel button on a past booking	**Should not be offered** — and the database refuses it even if the request is sent directly.	

2d. Your own details

Step	What to do	What should happen	Pass?
2.16	In Settings, open **My Details** and change your purok	Saves. Only puroks within Barangay Batinguel are listed.	
2.17	While **verified**, change your first or last name	A warning appears first. After saving, your account drops back to **pending** with a note for the official. *This is worth demonstrating.*	
2.18	Change your profile photo, then check storage	The photo you replaced is deleted rather than left behind.	
2.19	Change your password, sign out, sign back in with the new one	Works.	

3. Officials — any position

Every official can do these, whatever their position.

Step	What to do	What should happen	Pass?
3.1	Sign in as any official	You land on the official dashboard with 13 sections in the sidebar.	
3.2	**Announcements** — add, edit, delete one	Changes appear on the public Home page.	
3.3	**Events** — add, edit, delete one	Appears on the public Events page.	
3.4	**Waste Management** — change a collection day	Updates on the public Home page.	
3.5	**Officials Directory** — add and remove an entry	Updates the public Officials page.	
3.6	**Residents Registry** — add an entry	Note this is the barangay's own record of inhabitants, separate from the list of people with accounts. Currently sample data.	
3.7	**Reports**	Six-month trends, top document types, busiest reservation days.	
3.8	**Activity Log**	Every verification, approval, decline and cancellation, with who did it.	
3.9	Settings — change your own profile photo	Updates on the public Officials page. The old photo is deleted.	

3d. Resident verification (any official)

Step	What to do	What should happen	Pass?
3.10	Open **Residents** and find a pending account	Shows contact, purok, registry match and whether an ID was uploaded.	
3.11	Click **View ID**	The ID opens in a window over the dashboard. The link expires after two minutes.	
3.12	Read the registry match column	Green "In registry", amber "Similar name", or grey "Not in registry". Grey is a fact to check, not a reason to reject — the registry is incomplete.	
3.13	Click **Verify**	The resident can now request documents.	
3.14	Click **Reject** on another account	A written reason is required. The resident sees it and can correct their details and resubmit.	
3.15	Click **Not a Resident**	A written reason is required. The account is permanently ineligible, their uploaded ID is deleted, and they cannot put themselves back in the queue.	
3.16	Sign in as that ineligible person	They can still sign in and read why they were refused — deliberate, so a refusal is a message rather than a dead end — but cannot request anything.	
3.17	Click **Reinstate** on the ineligible account	Recoverable. A mistake by an official does not need a developer to undo.	

4. Position-restricted actions

These are the tests worth doing carefully. Officials who lack a permission still **see** the data — the buttons are replaced with a note. That is deliberate, for transparency.

4a. Barangay Treasurer only — court reservations

Step	What to do	What should happen	Pass?
4.1	As a **Kagawad**, open Reservations	You can see every booking, but the approve and decline buttons are replaced with “Treasurer only”.	
4.2	As the **Treasurer**, approve a pending booking	Approved. The resident sees it, and it is written to the Activity Log under the Treasurer’s name.	
4.3	Decline another booking	Declined, and the slot is released for someone else immediately.	

4b. Barangay Secretary only — document requests

Step	What to do	What should happen	Pass?
4.4	As a **Kagawad**, open Document Requests	Visible, but the action buttons read “Secretary only”.	
4.5	As the **Secretary**, approve a request	Approved. The resident’s dashboard updates.	
4.6	Mark it **Ready for Pickup**, then **Claimed**	The resident sees each change. After seven days waiting for pickup, the reminder turns red.	

4c. Punong Barangay only — Kapitan status

Step	What to do	What should happen	Pass?
4.7	As any other official, open Kapitan Status	Visible, but not changeable.	
4.8	As the **Punong Barangay**, change the status	Updates on the public Officials page.	

5. Nurse

Step	What to do	What should happen	Pass?
5.1	Sign in as the nurse	The dashboard opens with Medicines, Availability, Health Events and Settings.	
5.2	Open **Medicines**	13 medicines, each with a status of Available, Low stock or Out of stock.	
5.3	Tap a different status on any row	Saves immediately — no dialog. This is the action done daily, so it is one tap.	
5.4	Open the public Health Center page in a private window	The change is visible to an anonymous visitor, and the “Updated” time has moved. *Worth demonstrating end to end.*	
5.5	Add a new medicine	Category and form are dropdowns, not free text. The note field is for residents, e.g. “bring your prescription”.	
5.6	Try to remove a medicine	Prompts you to consider “Out of stock” instead, so a medicine residents know about does not simply disappear.	
5.7	**Availability** — edit a day, including the lunch break	Updates the public clinic hours.	
5.8	Set your status to **On Break**	The public page says so. Use this for an unscheduled break; the lunch hour shows itself automatically from the clock.	
5.9	Set a day to **On Leave**	That day shows as On Leave on the public page.	
5.10	**Health Events** — add one	Appears in the Bakuna calendar on the public Health Center page.	

6. Things that should fail

These prove the system stops what it ought to stop. Every one is enforced in the database, so it holds even if someone bypasses the website entirely — which anyone can, because the key in the page source is public by design. **The key is not what protects the data; the policies are.**

Step	What to do	What should happen	Pass?
6.1	As an unverified resident, request a document	**Refused.** Not just a hidden button — the database rejects the write.	
6.2	As a Kagawad, approve a court reservation	**Refused.** Treasurer only, enforced by policy.	
6.3	As a Kagawad, act on a document request	**Refused.** Secretary only.	
6.4	As a resident, try to cancel someone else's booking	**Refused.** You can only touch your own.	
6.5	Book a court slot that overlaps an existing booking	**Refused** by a database constraint, not only by the form.	
6.6	As an ineligible account, try to return to pending	**Refused.** Only an official can lift it.	
6.7	Change the name on a verified account	Allowed, **but** verification is withdrawn automatically. A name nobody checked cannot sit on a verified account.	
6.8	Sign up twice with the same email	No second account is created. Note the signup appears to succeed and no email arrives — deliberate, so nobody can probe which emails are registered.	

7. Known limitations — not bugs

Area	Behaviour	Why
SMS notifications	Approving a booking shows "could not be sent — contact the resident directly".	No SMS credits are funded. The approval still succeeds; the system degrades gracefully rather than failing.
Email delivery	Confirmation emails often land in spam.	Gmail SMTP is a development configuration. Production would use a transactional provider on the barangay's own domain.
Residents Registry	Contains sample entries, not real residents.	The real list was not available, and holding it would be hard to justify under the Data Privacy Act.
Purok list	Puroks 1–7.	Inferred from existing data and still to be confirmed with the barangay.
Health centre nurse	Shown as "Barangay Health Nurse" with no photo.	A role rather than a person. The previous name and photo were not real, and presenting a stranger as staff is worse than showing no face.

Record any step that behaves differently from the middle column, with its number and what happened instead. A failing step is more useful written down than remembered.
